

30. January 2014

Dear Customer

Partnership Between DYNAmore Nordic AB and SimEvolution AS

SimEvolution and DYNAmore Nordic has entered into a reseller agreement effective from January 2014.

SimEvolution will distribute the well established non-linear LS-DYNA explicit FE-code in both Norway and Finland. The LS-DYNA software suite will fit well with MSC Software portefolio the company has been selling from the very beginning.

SimEvolution gained approval as an MSC Impact Reseller in 2007 and has steadily been increasing the software offering.

The partnership with DYNAmore Nordic will strengthen the local support and offering in the two countries and provide you as our valid customer with the best proved and leading technologies in the market. Under the leadership of Aage Torvund the company is well placed to support existing customers in Norway and Finland and help them gain maximum benefit from the DYNAmore products.

In cooperation with DYNAmore we will offer high level technical support, training and engineering services.

We are proposing that SimEvolution becomes your first point of contact for any matter concerning LS-DYNA and we hope you continue to enjoy the relationship with us that has been established over the years.

Yours sincerely

Marcus Redhe
